

# Humming in Spanish

Book Three in the Lavandula Series, begins with Stevie mapping her first sexual encounter and Jolene working out some guilt, while Tate and her mother get a big surprise.

There's more, of course.  
There's always more...

## The Lavandula Series

Life rumbles the earth at Sweet Farm, like any compound full of women, their men, children, elders and friends. They breathe the air of the Valley, filled with the scent of lavender growing abundantly on ten fertile acres. They eat of the garden harvest. The women are restless. The men are nervous. The girls are growing up in the 60s and they and their peers will become known as Baby Boomers, Flower Children, Hippies, Yuppies, the ME generation; they will be affected by the Vietnam War, Rock & Roll, revolutions from sexual to political and other dramatic social changes. But, mostly, they will be dealing with their loves, their children and their homes as they relate to and are touched by those concerns mentioned above.

### Looking for John Steinbeck

Book One sets the scene for the stories of the Wymans, their offspring and relations, with Charles Huffington, Jolene's father, contemplating his recent behavior. He's conflicted, the three cousins are confused and the three sisters are weary.

### Deke Interrupted

Book Two continues the saga of Stevie Michel and her Sweet Farm family. This time, Stevie makes a bold move, Deke has a chance to tell his story and life at Sweet Farm continues to get more complicated.
